This is to certify that the Union Ink Company does not intentionally nor willingly nor knowingly use any chemicals in the manufacture its plastisol inks that are found on the lists of chemicals in California's Proposition 65.

We carefully examine all the Hazard Ingredient sections of all the Material Safety Data sheets from the suppliers of all chemicals we use for any mention of chemicals that are present on the Proposition 65 list. We subsequently rely on these representations to us by the suppliers of the materials we use to provide the basis of this certification.

Sincerely yours,
UNION INK COMPANY, INC.
